

Using the ultimate smartphone camera kit

1. Telescope Lens Clip
2. Telescope Lens
3. Universal Lens Clip
4. Selfie Light
5. Eyecup
6. Fisheye Lens
7. Wide Angle Lens
8. Macro Lens*

Please note: The wide angle & macro lens come as one lens, you will need to untwist them to use the macro lens on its own

Using the smartphone lens with selfie light and clip

1. Inserting your desired lens with the selfie light

Make sure the light is facing you and push the lens with thread side first through the hole in the middle of the light. You should hear a click when it is secure. Make sure that the end of the lens with the thread is the same side as the back of the light

2. Connecting your lens and light with the clip

Put the clip at the back of the light. Position so that the thread of the lens is in line with the thread in the hole of the clip and wind together

3. Position the clip over your camera lens

Align the clip over your camera lens. This might have to be adjusted to make sure that the clip isn't covering any of the camera lens

4. Turn on the selfie light

Press the button on the side of the light to turn it on

5. Start taking photos

Aim the mobile and take the photo or video as normal

Light specification

Input rating: 5V \equiv 500mA

Battery capacity: 60mAh

Using the ultimate smartphone camera kit

Using the Fisheye, Wide angle or Macro lens with the clip

1. Connecting your lens with the clip

Put the clip at the back of the lens. Position so that the thread of the lens is in line with the thread of the clip and wind together

2. Position the clip over your camera lens

Align the clip over your camera lens. This might have to be adjusted to make sure that the clip isn't covering any of the camera lens.
